

Applied Statistical Analysis

EDUC 6050

Week 14

Finding clarity using data

Today

Categorical Outcomes

Research Portfolio

Get into small-ish groups

Answer the following questions:

Question 1

What were the most common methods that you found in your studies?

Question 2

Were statistics commonly used or hard to find in your field?

Why do you think that is?

Question 3

Did you find any that seemed to not use the method correctly?

In what ways did they make any mistakes?

Question 4

Were the authors transparent about their approach (i.e., discussed it in sufficient detail)?

Did they post their data and/or analyses online somewhere?

Question 5

Was this assignment helpful?

Why or why not?
